Potential competing interests: No potential competing interests to declare.

The review is written well in terms of choosing the topic, and its writing covered several different points. However, the writing linguistically needed to be reviewed, and some sentences were somewhat ambiguous and needed some clarification. The research also needs to be updated. At least three 2023 references and two 2024 references are required.

I sent a Word file for the review, including most of what I need for correction.

Thanks and regards,
