**Potential competing interests:** No potential competing interests to declare.

Considering to your technique prefer to add these references and refer to your methodology is a good writing and clear but try to make them more clear and cite these titles as references because many mistakes found and the titles as the following:

1. A new thrust vector-controlled rocket based on JOA using MCDA
2. Automation intelligence photovoltaic system for power and voltage issues based on Black Hole Optimization algorithm with FOPID
3. Jaya optimization algorithm implemented on a new novel design of 6-DOF AUV body: a case study
4. Design and Simulation of a Compact Metal-Graphene Frequency Reconfigurable Microstrip Patch Antenna with FSS Superstrate for 5G Applications
5. Enhancement of electro hydraulic position servo control system utilising ant lion optimiser
6. Implementation enhancement of AVR control system within optimization techniques
7. Rider Optimization Algorithm implemented on the AVR Control System using MATLAB with FOPID
8. A new novel optimization techniques implemented on the AVR control system using matlab-simulink

Your methodology needs to mention the flowchart with its equations, tables, figures...etc.

Need to give a brief conclusion of your results and analysis.

Make your references according to the journal template and be careful at this point.
