Potential competing interests: No potential competing interests to declare.

The manuscript is well written but, I agree, certain methodological aspects need to be better explained:- The data analysis needs to be fully developed.- Figure 1 should reflect the male-female dichotomy.- The references should be revised, as there are several citation errors in the text, for example: (*Attia et al., 2021*); *Ben Yahya et al. (2023)*; (*Ben Yahya et al., 2020*; *Coffey & Toland, 2019*; *Martinho et al., 2017*; *Yin et al., 2014*).
