

Review of: "Comparative Analysis of Teacher Professional Development Models in Indian Higher Education: Implications for NEP Implementation"

Arturo Basbas

Potential competing interests: No potential competing interests to declare.

This is an interesting topic, and I could see how you divulge the impact and implications of professional development models in your country. However, this paper could have been better if the author could:

- Associate the related scholarly works with his own research.
- Expound on the literature, methodology, and in-depth interpretation of the results.
- Explain how he came up with the awareness level in Table 5. Mention it in the methodology.
- Emphasize how he came up with the optimism level in Table 6. Mention it in the methodology.
- Rephrase and summarize the discussion. Do not itemize, and there is no need to mention the table no. It should be in a narrative form.
- Emphasize his own policy intervention in the conclusion part.

Thanks
