

# Review of: "Investigations on Input Impedance and Radiation Pattern of a UWB Antenna for Microwave Imaging"

Himel Kumar Saha

Potential competing interests: No potential competing interests to declare.

1. References used for the literature review are not updated. Increase the number of recent reference works.
2. Figures (1-5) are poor in quality. Please use high-definition figures to make your paper more visible.
3. References used in "Table 2" are not enough. Use more relevant work in "Table 2".
4. Simulation results and measured results are almost the same. That's a good sign for this paper.
5. Check the grammatical errors and spelling errors carefully.
