The author presented the manuscript in a well-planned way. The title "Beyond Boundaries: Exploring Livability in Diverse CPTED-Enhanced Neighborhoods of Bengaluru" matches perfectly with the literature and discussion of the paper. However, there are some areas that should be considered. The Abstract of the manuscript should be shorter in length. Figures and tables may be presented in a more organized way. Some sophisticated statistical analysis can easily be added here. The introduction part can be presented in a more precise way. Overall, it would be a good piece of work if the above-mentioned issues are taken care of.
