Potential competing interests: No potential competing interests to declare.

The subject of the paper is interesting, and during the period of 2 years ago, it was very actual. It is not the same with the content of the paper. I expected to see and read any kind of comparison in the situation with internships before, during, and after COVID-19. I think you need to change the figures - they have a different style and will be more readable if they are in color.

Maybe more important is to find and read papers from the last few years. In your references, you have only 2 references from 2018 and 2020; all others are very old. You have not checked what other researchers think about the same or similar problems. Update your references.
