Title: Enhancing Supply Chain Management Risk Mitigation: A House of Risk Methodology Applied to Brick Manufacturing in Aceh Besar Regency

The presented article deals with Supply Chain Management Risk Mitigation. The subject of the manuscript is interesting, and the manuscript may also be useful for the readers of Qeios. The manuscript is presented well and requires some modifications, which are given as follows along with the comments.

The abstract part should be extended, and the introduction must be improved.

The literature review part is missing in the manuscript. A separate section on literature review must be added to the manuscript.

The proposed approach has been discussed well. I request the authors to add a comparison of the used approach with other available similar approaches.

The problem formulation part is also OK.

The conclusion part must be extended with a clear scope for future work.

The presented manuscript is not acceptable for publication, and I must recommend a minor revision.
