Pollen Extract PCC-100

National Cancer Institute

Source

National Cancer Institute. *Pollen Extract PCC-100*. NCI Thesaurus. Code C162193.

A pollen extract with potential use in the management of certain vasomotor symptoms of menopause. Upon administration, pollen extract PCC-100 may, through a non-estrogenic but not fully elucidated mechanism of action, reduce the incidence and severity of vasomotor symptoms and may be a safe alternative for some individuals.
