Dear editor,

Dear author,

Thanks for the opportunity to review

A very good and practical study was done. A number of comments to improve the article are suggested as follows.

It is necessary for the researchers to provide more explanations for the readers in relation to the village (Research location) in **introduction**.

In the **method section**, there is not enough explanation regarding the data collection tool (questionnaire) from the following aspects:

- Sampling method?
- How to formulate and sources of questionnaire items?
- Number of items in each dimension?
- Questions in every dimension?
- Validation?

The **discussion** is incomplete and no comparison or criticism was made with the existing literature.

Sincerely
