Potential competing interests: No potential competing interests to declare.

This article is very pertinent, especially in low-developing countries. It is relevant to a number of countries amidst the increasing burden of non-communicable diseases and meagre financial resources. The authors exhaustively tackled the human resource workforce. But beyond this, when establishing a multidisciplinary oncology unit, they can put other factors into play, e.g., leadership, finances, health information, and service delivery. What are the opportunities, challenges, and lessons learned from each block?
