Potential competing interests: No potential competing interests to declare.

1. The article has intermediate priority.
2. The subject of the article is within the scope of the journal.
3. The abstract is adequate and informative.
4. The interpretations/conclusions are sound and justified by the data.
5. The structure of the article has no major weaknesses.
6. The tone and language of the article are professional and polite.
7. The article, in general, is constructive and supportive.
8. The references were written in the correct Vancouver method or style, but 6 of the total 8 are not recent references because they were not published in the last five years. It is a very poor percentage; therefore, the references need to be updated.
