# Clostridium citroniae

National Cancer Institute

## Source

National Cancer Institute. *Clostridium citroniae*. NCI Thesaurus. Code C122264.

A species of gram-positive, obligate anaerobic bacteria in the family Clostridiaceae. *C. aldenense* is indole positive and produces acid from glucose, maltose, mannose, rhamnose, sucrose, trehalose, and xylose but not from cellobiose, esculin, lactose, mannitol, melezitose, raffinose, salicin, sorbitol, or starch. This species does not hydrolyze urea, esculin, starch, or gelatin or reduce nitrate.
