Potential competing interests: No potential competing interests to declare.

The introduction provides a clear rationale for the study and sets the stage effectively. However, it could benefit from a more concise summary of the objectives and expected contributions. The methodology section is well-structured, but it lacks a detailed discussion of the sampling methods, which is crucial in a study like this. Provide more information about how the sample was selected. Consider discussing potential biases and limitations associated with the chosen methodology. Address the minor issues related to methodology and references. Overall, this paper has the potential to be a valuable addition to the literature on CSR and competitiveness, provided the suggested improvements are considered and implemented.
