

Review of: "The Efficacy of Copper Nanoparticles in Treating Viral Skin Infections: A Systematic Review and Meta-Analysis"

Elnaz Mousavi

Potential competing interests: No potential competing interests to declare.

General Recommendations:

- **Consistency:**

- Ensure a consistent level of detail and depth across different sections to maintain a cohesive flow throughout the article.

- **Visual Aids:**

- Consider incorporating visual aids (figures, tables) in relevant sections to enhance the presentation of data and key concepts.

Overall:

The article is well-structured, informative, and provides a thorough exploration of the efficacy of copper nanoparticles in treating viral skin infections. Implementing the suggested recommendations can further enhance engagement, clarity, and the overall impact of the article.
