The Attitude of Teachers towards Hinderances Affecting Safety in Secondary Schools

The is a very important study very crucial in these times. I however noted some few error that the author may need to address.

In the title "**Hindrances**" not Hinderances

1.2. Background To The Study

... further explains that the violation of learners"

the double-quote should have been a single quote.

2.3.

The significance of the current policies/ and legislation

the slash must have also been a typographic error

Dano and Thwala (2022) opine

I think should appear in past tense (opined)

3. Summary

You summary was well presented how ever towards the end you have this (Having said that, the next chapter presents the summary, findings and recommendations for the study) I thought this chapter is the summary already, and there is no need telling the reader about the next chapter when this chapter is the last chapter of the paper.

Well done.

Thank you.
