Potential competing interests: No potential competing interests to declare.

1. The intro section is so long.
2. In the intro section, some parts should be deleted.
3. Figure 4, the SAR investigation should be added to the figure itself; this will be clearer and easier for the reader.
4. Figures 7-11:
 - SAR for the drugs must be summarized.
 - Figures 7-11 can be collected with each other to form only one figure.
 - Add the trade names for the mentioned examples if possible.
1. Figures 12a-c:
 - The affiliation of the figures is not valid; it must be changed. Figures 12a-c only show quinolone compounds by their chemical structures; no chemical reactions have been shown in the figures, so the affiliation "chemical reaction of quinolone" is not valid here.
 - Figures 7-11 can be collected with each other to form only one figure.
 - Add the trade names for the mentioned examples if possible.
1. Some words must be written in italics such as "via."
