Potential competing interests: No potential competing interests to declare.

TITLE: The title is long and ambiguous pertaining to the contents of the research

Abstract: acceptable

Introduction: Well written.

Materials and methods:

How was Income considered average?

How compared to the geographical location?

The authors should describe the demographics specific for that geographic location (for instance, annual family

Results:

How did other factors, such as Annual Family income> did that have an effect Positive or negative on the well being intervention assuming that a higher income had favorable impact on mental well being. Similarly, growing up in a village verses the Town (city) did that have an impact on the well being (again assuming those in the village better well being than city or town raised counterparts on mental well being.

Discussion:

Each result should be weighted by studies that either support or contradict it, The discussion needs more elaboration.

Conclusion:

Good
