

Review of: "Comparing the Effectiveness of Aloe Vera Gel and 2% Chlorhexidine Gluconate Solution in Preventing Phlebitis Caused by Peripheral Vein Catheters in Hospitalized Patients"

Margrit M. Ayoub

Potential competing interests: No potential competing interests to declare.

Comment 1: You need to number the lines to make the reviewing easier.

Comment 2: In the abstract-methods-the third line (they got), what is the meaning of this sentence?

Comment 3: In the abstract, what is the meaning of cc of aloe vera?

Comment 4: The introduction: you have to write what the market products are used to treat phlebitis, and what you will add by this study.

Comment 5: You have to add some pictures or figures for the disease before and after each treatment and for the control group.

Comment 6: What is the amount or the concentration of the gel used in the research?
