Potential competing interests: No potential competing interests to declare.

The write-up presents a clear overview of Mahasneh Theory 2023 and the philosophies on which it is based. The incorporation of Islamic philosophy, the philosophy of the ideal (drawing from Plato), and Chinese wisdom adds a diverse and holistic perspective to the theory. The explanation of how the theory crystallized, drawing on the researcher's experience in education and vocational training, enhances its practical foundation.

The inclusion of entities that help develop students' professional attitudes and inclinations, along with their respective roles, adds depth to the discussion. The visual representation in Figure 1 provides a clear and concise summary, making it easier for readers to grasp the key components of the theory.

The methodology section explains the researcher's approach in using the descriptive analytical method, which is appropriate for the topic. However, more details on specific sources or case studies could further strengthen the methodology section; therefore, further investigation with more appropriate methods is needed.
