**Potential competing interests:** No potential competing interests to declare.

## **Areas for Improvement:**

### **1- Citations:**

While the paper mentions John McCarthy's concept of "publicized computing" from 1961, it could benefit from more recent citations to showcase the latest developments in cloud computing.

### **2- Visual Aids:**

The paper could benefit from more visual aids, such as charts or graphs, to enhance the understanding of comparisons between cloud platforms or illustrate key points.

### **3- Empirical Evidence:**

While the paper covers theoretical aspects well, incorporating empirical evidence or case studies of educational institutions that have successfully adopted cloud computing could strengthen the practical applicability of the proposed model.

### **4- Conclusion:**

The research paper provides a solid foundation for understanding the challenges and opportunities associated with the adoption of cloud computing in educational institutions. Strengthening the paper with recent citations, visual aids, empirical evidence, and a concise conclusion would enhance its overall impact.
