Ampullary Noninvasive Papillary Neoplasm, Pancreatobiliary Type

National Cancer Institute

Source

National Cancer Institute. *Ampullary Noninvasive Papillary Neoplasm, Pancreatobiliary Type*. NCI Thesaurus. Code C95913.

An exophytic, preinvasive, papillary epithelial neoplasm that arises from the ampulla of Vater. Histologically it resembles the papillary neoplasms of the biliary tree. This category includes neoplasms with low grade dysplasia and high grade dysplasia.
