Potential competing interests: No potential competing interests to declare.

State 'FEMA' in full in its first appearance both in the Abstract and in the main text.

This article could be noticed as General Review but it needs more detailed structure in order to deliver a full message. The topic need to be covered in other places rather than the US. There could be a deeper search on the late COVID concerning mental health issues worldwide. Illustrations and flow charts can add a lot to the communication of information.

In fact the language is good and the topic deserves more input and deeper elaboration.
