Potential competing interests: No potential competing interests to declare.

This research is quite new in ecological leadership topic. Here are my feedback for this paper:

Introduction part:

- a. Add and explain about the environmental condition of churches in Indonesia. What is the uniqueness of this church?
- b. Give more references on previous research regarding this topic.
- c. Explain the importance of this research to academics and practitioners.
- d. Relate the biblical words to the situation of the field.
- e. Give more points on ecological leadership and church based on references of journal articles which have been published.
- f. Explain the leadership situation in this church. What is the urgency to do this research?
- g. Relate and elaborate the relation between this church situation and ecological leadership.

Write a literature review or theoretical anchor to explain the content and context.

- a. Describe and explain the theory of ecological leadership based on the previous research.

Research Method

- a. It is a research method NOT research methods.
- b. Describe and explain the research approach in a more systematic way.
- c. Explain more on the procedure of your field research (data collection, interview, research design).

Discussion part:

- a. Why did you put the explanation of The Old Testament Ecological Leadership Perspective in the theoretical study of Dr. Bambang Budijanto? What is the relation of this perspective of this research? If so, put a little explanation regarding this into the introduction and literature review.
- b. Contrast the finding of research to the theory of ecological leadership.
- c. What is the contribution of this research?
- d. Give a brief conclusion.
