

Review of: "Development of Traditional Packaging Design Innovations in the Present Context Using Technology for Packaging (Case Study: CV. XYZ)"

Süleyman Gökmen¹

¹ karamanoglu mehmet bey University

Potential competing interests: major revision is required. Which traditional and natural packaging can be used for packaging traditional foods? This can be explained by giving examples of locally traditional foods. Apart from this, edible coatings, natural packaging materials, etc. There are many studies on packaging materials. These studies need to be summarized. We can consider the Indonesian example. By explaining the traditional foods and production technologies here, it is necessary to specify which natural packaging will adapt to which traditional foods.
