Dear author

1. thank you for this manuscript that deals with substantial issue regarding research in clinical field and pharmacy practice and re calling the available guidelines

2. In section 4 of the manuscript;

Traditional QA practices rely heavily on audits to detect sites or studies with quality issues (9-12)

the above statement need more clarification referring to **quality issues (9-12)** those numbers refer to the table content or not?

3. many abbreviations need to be in full term at first such as ; COVACTA study, ICH GCP R3, EMA, MALMED, EU/EEA, CAPA, CROs, IMP etc

since you well defined UK and WHO

best of luck
