

Review of: "Investigation of Mechanical Properties of Sisal Fiber and Sugar Palm Fiber Reinforced Hybrid Composites"

Jaya Suteja¹

¹ Universitas Surabaya

Potential competing interests: No potential competing interests to declare.

1. You should describe the polymer matrix that is reinforced by the natural fiber.
2. Please explain this sentence: "Due to the cost-effective machining of metal alloys, natural fiber-reinforced composites are in high demand."
3. The literature survey is not well structured. It has not been analyzed yet to find the research gap.
4. Please explain why hybrid composites were made with sisal fibre and sugar palm fibre.
5. Describe the specification of the epoxy resin that was applied.
6. Please provide the mechanical properties of the sisal fibre and sugar palm fibre.
7. You should discuss the experiment results, i.e., why the addition of sisal fibre increases the mechanical properties of the composite.
