Impacts of Innovations in Financial Services Delivery on the Macroeconomy in Nigeria

Abstract:

- An academic abstract should be developed by stating the research aims/ objective, the sample used, the time horizon, the research methodology, the main findings, the research implications and the work's originality and contribution to the literature.

Introduction:

- The authors failed to come up with research questions that encompass the motivation for the study. What is the problem at hand that this study attempts to solve and why?

Data and Description:

- The author failed to justify the period considered in the study

Interpretation of Results:

- The interpretation of the results is not adequate enough, there is need for further elaboration
- The author failed to compare findings from this study with other studies done to justify reason for the differences in result.
