**Potential competing interests:** No potential competing interests to declare.

The paper explores the intricate connection between reading and artificial intelligence, looking at the various ways that AI has impacted our reading habits. It looks at the advantages AI has to offer, such as personalized learning platforms and virtual reading tutors. The paper offers suggestions for leveraging AI to enhance students' reading skills while highlighting the importance of a cautious and balanced approach to integrating technology in education. However, this paper consists of just a few reflections and is not substantiated by any experience and, as such, does not have results for analysis and discussion.
