

Review of: "Does a 'Creativity Crisis' Truly Exist Among Science Learners?"

Ali Rıza Akdeniz

Potential competing interests: No potential competing interests to declare.

Article "Does a 'Creativity Crisis' Truly Exist Among Science Learners?" is understable and acceptabel to print as a article.

But the following suggestions shoul be taken in to considerations

1- "Methodology subtitle" should be written in stadet of "the study"

2- Data analysis is written separete in the methodology part

3- "Results" should be written separet as a subtitle

4- After conclusion "suggestions" should be made as a sepetare subtitle

Sincerely yours

Prof. Dr. Ali Rıza AKDENİZ
