

# Review of: "A Smart Vehicle Charging Station Identification Based On IOT with Hybrid Grey Wolf-Bat Optimization Enriched On Artificial Neural Networks Recognition Methods"

He Li

Potential competing interests: No potential competing interests to declare.

1. More detailed descriptions are needed in the algorithm optimization section.
2. The authors need a more detailed experimental process to verify the effectiveness of the proposed solution.
3. The authors can make the reader understand the whole process more clearly through flowcharts.
