

Peer Review

Review of: "Investigating the Role of Vitamin D in the Prevention and Control of Dengue Virus Vectors and Related Diseases: A Systematic Review"

Noor Hallab¹

1. ALKARKH UNIVERSITY FOR SCIENCE, Baghdad, Iraq

We thank the researcher for his efforts, but there are some comments.

- 1- Modify the title to be more appropriate, such as: Studying the role of vitamin D in the prevention and control of dengue fever and related diseases.
- 2- Expand the introduction and highlight the importance of dengue fever and the available treatment options, and why vitamin D was chosen.
- 3- Use abbreviations without indicating their meaning.
- 4- The number of studies included in the review is very small, and this may be due to the fact that the study is recent.
- 5- The results did not provide a clear explanation, so please focus on discussing the results.
