Rush Farming of Konjac (Amorphophallus Muelleri) Among Novice Farmers in West Java, Indonesia: A Descriptive Study

Comments

By and large, the topic fits into the scope of the journal, The paper will contribute significantly to knowledge. The findings are quiet enriching in the field and can be a tool in the hand of stakeholders in Rush Farming of Konjac.

The abstract has the entire necessary component for a scientific research.

The introduction was able to explain the motivation for the study and bring out clearly the aims and the objectives of the study.

The methodology has the structure of a scientific research.

The results are well stated. The Discussion is well articulated. The results findings were confirmed with other related work in the area, which is good.

References are satisfactory

After reading the manuscript to the best of my knowledge, the work will be a good one if these minor corrections are make which may be observed by other reviewers.

This paper can be considered for publication after any minor editing.
