11D10 AluGel Anti-Idiotypic Monoclonal Antibody

National Cancer Institute

Source

National Cancer Institute. *11D10 AluGel Anti-Idiotypic Monoclonal Antibody*. NCI Thesaurus. Code C28781.

A monoclonal anti-idiotypic antibody adsorbed to aluminum hydroxide gel (AluGel) with potential antineoplastic activity. 11D10 AluGel anti-idiotypic monoclonal antibody mimics the human milk fat globule (HMFG) antigen found in breast and other cancers. Vaccination with 11D10 AluGel anti-idiotypic monoclonal antibody may induce a host antibody response against tumor cells positive for the HMFG antigen. (NCI04)
