Review of: "Web-Based Crime Management System for Samara City Main Police Station"

Bibin Chidambaranathan[1]

1 RMK Engineering College

Potential competing interests: No potential competing interests to declare.

1. Providing a brief literature review to highlight the existing gap and the significance of automated crime management system.

2. Clearly state the objectives of the "Web-Based Crime Management System" project in the abstract.

3. Specify the intended outcomes and functionalities that the system aims to achieve.

4. Elaborate on the reasons behind choosing an online crime management system over a manual method.

5. Provide evidence or examples of how automation can enhance the efficiency of crime control and management.

6. Are there specific features intended for citizens, police officers, or administrators? Clearly outline the functionalities that different user groups will access.

7. Include a brief mention of the technology or platform used in developing the web-based crime management system.

8. Highlight the novelty of the proposed "Web-Based Crime Management System." What distinguishes it from existing systems, if any?

9. Briefly mention the user interface design and accessibility features of the system.
