Review of: "Exploring machine learning techniques to develop predictive models to address unemployment rates in the implementation of Industry 4.0"

Dr Rajesh Pasupuleti

Potential competing interests: No potential competing interests to declare.

1. need to appreciate authors work for predicting models for unemployment

2. In abstract discuss briefly algorithms used accuracy and error rate

3. remove general content of theory and add refernce numbers , quote it

4. Represent literature survey as table format with pros and cons

5. add architectural diagram

6. add implementation, comparative based analytical results
