

Review of: "Building Foods Data Automation Platform Using Cloud Computing Type PaaS"

Dr Reddy Saisindhutheja Saisindhutheja

Potential competing interests: No potential competing interests to declare.

1. The abstract does not discuss the main issue and technical aspects clearly. The main objective is missing.
2. The introduction must define the key contributions, solutions, and limitations of the existing works.
3. Figures and tables are not cited.
4. The comparative analysis of the proposed PaaS-based platform with other existing solutions is missing. It is very tough to evaluate the efficiency of the proposed work without using performance metrics.
5. The conclusion needs to be extended with future work.
6. Grammatical mistakes need to be taken care of.
