Potential competing interests: No potential competing interests to declare.

The paper analyzes a very current and important topic.

- Econometric models have only been mentioned, and they should be explained in more detail with references to the most famous research.
- The literature review is not structured in the best way and does not hold attention during reading. Too many enumerations. Consider a tabular representation.
- More clearly indicate the conclusions and implications in the last part of the paper.

I recommend the work for publication after minor revisions.
