Dear authors,

Congratulations on your rare case report. I think it will be useful for clinicians in clinical practice. However, I recommend using the Equator Network checklist, such as the CARE checklist, to improve the quality of your article. Additionally, you should write the clear version of the abbreviation in the first place where the abbreviation is mentioned in your article. In accordance with the spelling rules, the first occurrence of the abbreviation must be written clearly. Finally, your references are too old. Since we are in 2024, they have references that are approximately 20 years old. In this respect, it is necessary to review your references. Thank you very much for your efforts. I wish you good work.
