DUX4L1 Gene

National Cancer Institute

Source

National Cancer Institute. *DUX4L1 Gene*. NCI Thesaurus. Code C124048.

Human DUX4L1 gene is located in the vicinity of 4q35 and is approximately 2 kb in length. The product is a processed pseudogene that produces an RNA transcript, but does not encode a protein product. This gene is within a D4Z4 repeat array; contraction of this macrosatellite repeat is associated with facioscapulohumeral muscular dystrophy (FSHD).
