**Potential competing interests:** No potential competing interests to declare.

1. Introduction: Give full form first for (SARS-CoV-2).
2. Methods: How questionnaire was developed, how it was validated? What is the reliability and what methods were used to validate it. Provide questionnaire in supplementary material.
3. Results. Why the non-response rate of students was higher? Authors must discuss this in discussion section.
4. Discussion: Discuss your results with other studies related to COVID-19 among medical students of Pakistan such as Khidri FF, Riaz H, Bhatti U, Shahani KA, Kamran Ali F, Effendi S, Rani K, Chohan MN. Physical Activity, Dietary Habits and Factors Associated with Depression Among Medical Students of Sindh, Pakistan, During the COVID-19 Pandemic. Psychol Res Behav Manag. 2022 May 25;15:1311-1323. doi: 10.2147/PRBM.S364540.
