**Potential competing interests:** No potential competing interests to declare.

A few amendment is needed to make this paper better:

Short forms should be avoided in Keywords.

"We" keyword should be avoided in the whole manuscript.

The same spelling of Microcontroller should be used throughout the manuscript.

Avoid starting sentences with keywords "And" and "Because".

The same abbreviation GPIO (General Purpose Input Output) is used twice. Remove the latter one.

Unnecessary "." should be removed.

In Table 1, Data is written as "Daya" and the spelling of "Kontrol" is incorrect. Rectify it.

Figure 7 should be illustrated more by meaningful labeling of various devices.

Cite all images in the text.

The authors need to add the literature review from the year 2023 and compare the results with the existing ones.

Add future scope in the conclusion section.

Mention the contribution and organization of the paper in the introduction section.
