Potential competing interests: No potential competing interests to declare.

1. It is an interesting topic.
2. Introduction should be rewritten with core contribution and structure of the article.
3. What is the research gap and how does this paper fill the gap?
4. Two explanatory variables are insignificant among three, indicating less importance of taking these variables.
Interestingly, they mentioned some articles with significant impact of those variables on economic growth.
5. Also, they did not provide any reference for supporting their findings.
