Review:

Thank you for allowing me to review the study titled "The Iron Cage of Internal Efficiency: A Content Analysis of Digital Transformation Strategy Direction in Swedish Regions."

The paper has been well-organized, and here are some suggestions to enhance its quality:

The author needs to consider the urgency level of conducting research in Sweden by presenting academic references. In the paper, the author mentions the absence of research on digital transformation in Sweden ("no previous empirical research on Swedish regions and their digital transformation strategies"), considering the extensive research on digital transformation. The author should substantiate these statements scientifically, given the breadth of research on digital transformation.

In general, the paper is already comprehensive.
