Peptidyl-Prolyl Cis-Trans Isomerase A

National Cancer Institute

Source

National Cancer Institute. *Peptidyl-Prolyl Cis-Trans Isomerase A*. NCI Thesaurus. Code C156929.

Peptidyl-prolyl cis-trans isomerase A (165 aa, ~18 kDa) is encoded by the human PPIA gene. This protein plays a role in cyclosporin-mediated immunosuppression, HIV virion assembly and protein folding.
