# Old or Age Indeterminate Anterior Myocardial Infarction by ECG Finding

National Cancer Institute

## Source

National Cancer Institute. *Old or Age Indeterminate Anterior Myocardial Infarction by ECG Finding*. NCI Thesaurus. Code C102684.

An electrocardiographic finding of pathologic Q waves in leads V3 and V4, which is suggestive of myocardial infarction of the anterior wall of the left ventricle, without evidence of current or ongoing acute infarction. (CDISC)
