Review of: "The Influence of an Artificial Intelligence Large Language Model (ChatGPT) on Orthopaedic Scientific Publishing: A Bibliometric Analysis"

Yasir AlShehri¹

1. University of British Columbia, Canada

I thank the authors for this contribution. This is a timely and relevant bibliometric analysis.

A large number of articles from high-impact journals were included in this analysis, which strengthens the study. The scientific analysis was done correctly. The use of Welch's t-tests is appropriate, and the results were reported correctly.

The strengths and limitations sections are sound.

I have no changes to recommend.
