Potential competing interests: No potential competing interests to declare.

Thank you for considering me as the reviewer of this manuscript.

There are several issues regarding this systematic review that authors should consider:

Provide an explicit statement of the objective(s) or question(s) the review addresses.

Specify the inclusion and exclusion criteria for the review and how studies were grouped for the syntheses.

Specify all databases, registers, websites, organizations, reference lists, and other sources searched or consulted to identify studies. Specify the date when each source was last searched or consulted.

Please add the date of the search .

Present the full search strategies for all databases.

Specify the methods used to collect data from reports.

List and define all outcomes for which data were sought.

Specify the methods used to assess the risk of bias in the included studies.

Describe any methods used to assess the risk of bias due to missing results, and present assessments of the risk of bias for each included study.

Present assessments of certainty (or confidence) in the body of evidence.

Discuss any limitations of the evidence included in the review.
