# Y 90 Monoclonal Antibody m170

National Cancer Institute

## Source

National Cancer Institute. *Y 90 Monoclonal Antibody m170*. NCI Thesaurus. Code C2532.

A radioimmunoconjugate of m170 monoclonal antibody (MoAb) conjugated with isotope yttrium 90. MoAb m170 is a murine MoAb that recognizes MUC-1 antigen present on the surface of many adenocarcinomas. This radioimmunoconjugate emits beta particles that cause cytotoxicity in tumor cells and has both imaging and therapeutic uses.
