Review of: "Enhancing Project Performance Forecasting using Machine Learning Techniques"

Sushila Palwe¹

1. MIT-WPU, Pune, India

Paper is accompanied by a short literature survey; it can be enhanced with more recent studies in this area. Objectives need to be mentioned clearly. Methodologies ARIMA and LSTM are to be discussed in depth with a proper functional comparison of them. Performance analysis matrices and their usage are not addressed. Overall, the paper needs major revisions.
